hey marwan!

we're happy to fit jony and tang and just sit down with y'all to walk you through the tech if that would help.

please let me know! :)

best,

after asking and not hearing back from a representative at iyo about additional ear fittings.. i looked them up on linked in and i think he got wind i'm looking around, or the admin forwarded my requests.

would you want to engage on the following?

1. additional fittings for our team to try the product. maybe we can at least get you, dan, hugo, shota..

2. asking about their library or ear models via the ear project. iyo themselves have only made ~200 VAD devices for sale, but the organization they work with called [The Ear Project](#) must have thousands. if the data is anonymized and legal to share/purchase it could be a helpful starting point on ergonomics and HF.

will find you to chat more later in office.

hi jason,

nice to hear from you!

thanks for the note and offer, and more generally, i appreciate you and your team making awesome audio products.

would love to get tang fitted for starters :)

is it possible to extend the offer to two or more curious people on my team so they can also get to demo the VAD PROs i have?

thanks

sure! is there a good time later next week to have the impressions done? ideally we'd take care of y'all at the same time. thursday or friday possible?

best,

thanks jason!

we're excited to get more people trying bespoke audio.

some folks on my team are out this week, so to do this for everyone at the same time, next week would work best.

we can do this on a thursday or friday if that is still preferred for next week — just let me know if that still works and i will send a few options for scheduling.
